

Alliance for a Regenerative BioEconomy

ECONOMY. HEALTH. PLANET. TOGETHER.

FARMERS

INDUSTRY

PUBLIC HEALTH

PLANETARY HEALTH

OUR MISSION

Accelerating the adoption of renewable, agriculture-based materials and technologies in commercial markets, supporting industrial hemp farmers, processors, and bio-based materials research and development.

OUR APPROACH — FOUR PILLARS

FARMERS

Equip growers with regenerative practices, applied research, and new market opportunities for agricultural-based materials.

PUBLIC HEALTH

Advance food and material systems that protect community health and reduce pesticide and herbicide exposure.

INDUSTRY

Build supply chains and manufacturing partnerships that convert regenerative crops into biobased materials and products.

THE PLANET

Hemp remediates soil, uses less water, and requires fewer pesticides than conventional row crops. Beneficial rotational crop that sequesters carbon.

WHAT WE DO

Land & Agriculture

- Industrial hemp production and processing
- Soil health & carbon-smart farming
- Natural fiber supply chains
- Increases land productivity

Materials & Industry

- Biobased building materials
- Regenerative Biofuel Feedstock
- Biobased manufacturing
- Circular economy initiatives
- Sustainable materials R&D

People & Communities

- Farmer education & workforce training
- Economic growth that supports planetary health
- Rural economic development
- Diverting landfills

LEADERSHIP

Sam Friedman

Howard Rosenberg

Ralph Brill

Partner with us

We are a 501c3 that can facilitate R&D of bio based materials, establish sustainable procurement and supply chain pathways, scale production from prototyping all the way to TRL10, facilitate training and educational programs, and carry out market research or policy advocacy campaigns.
